Notice of Transportation Charges effective 1 October 2009

Please find attached Northern Gas Networks' Notice of Transportation Charges to apply from 1 October 2009.

Northern Gas Networks Limited (NGN) has a reasonable endeavours requirement to change prices once a year on 1 April. However we also have a best endeavours requirement not to exceed our maximum DN transportation activity revenue.

Since prices were fixed in January 2009 for implementation on 1 April 2009, substantial reductions in the price of shrinkage gas, coupled with reductions in the cost of our repex programme, have reduced NGN's allowed revenue such that we anticipate over recovering revenue in formula year 2009/10. To target a position of no over or under recovery by 31 March 2010 NGN is reducing unit charges by 5% on 1 October.

This notice is issued in compliance with NGN's licence and network code obligations.

If you have any queries please do not hesitate to contact me.

Yours sincerely,

Anna Taylor
Pricing Manager
