

## Northern Gas Networks - Customer Survey Results Full Regulatory Year, April 2014 - Mar 2015

All Gas Transporters (GTs) in Great Britain are required by the Office of Gas and Electricity markets (Ofgem, the industry regulator) to undertake quarterly postal surveys to gauge customer satisfaction. These surveys are designed to assess the satisfaction of customers in relation to work carried out by GTs on customers' service pipes. There are now three surveys: one in relation to a planned interruption to a customer's gas supply, the second in relation to an unplanned interruption of a customer's gas supply and the third related to connections work.

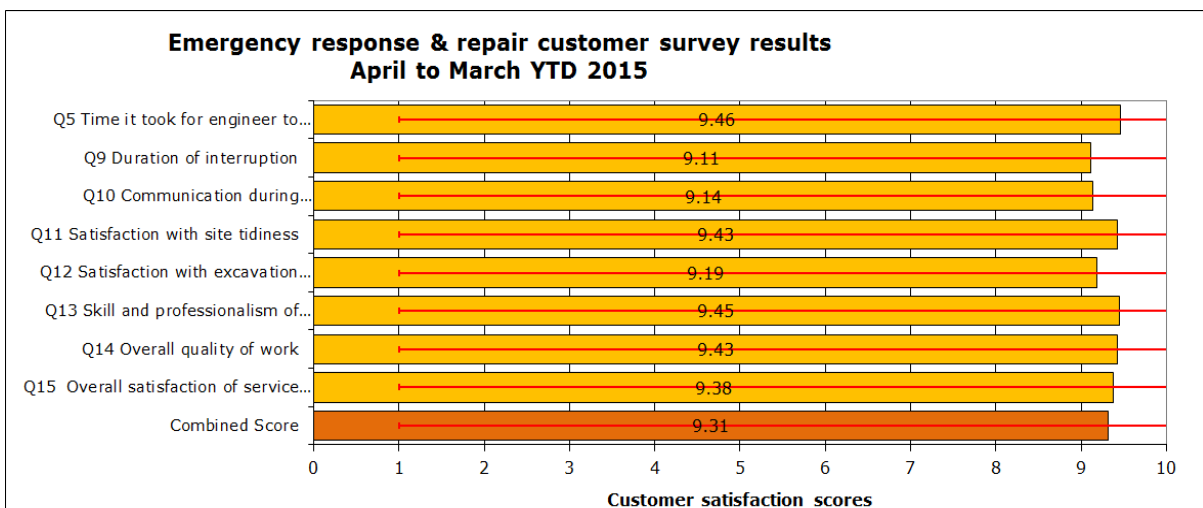

Northern Gas Networks has contracted with TTI Global Research to conduct the surveys. Customers are asked to provide a score (1 being the lowest, 10 being the highest) against a range of questions.

Below are the results from quarter one to quarter four (Y10) survey.
