Property details

How would you describe your property?

Terrace ☐ Flat ☐ Semi-detached ☐ Detached ☐

Other ☐ If other, Please specify: _____

Is the building Grade listed?

Yes ☐ No ☐

Is the property timber framed?

Yes ☐ No ☐ Partly ☐

What type of building do you want to connect?

Existing building(s) ☐ New building(s) ☐ Please note, for new buildings you will need to include a to-scale site plan with your application

Both ☐

Will the work involve crossing shared or private land that you do not own?

Yes ☐ No ☐

Existing buildings: Has the building been empty for more than two years?

Yes ☐ No ☐

Existing buildings: Is the property classed as a conversion, e.g. change from commercial premises being converted to domestic premise?

Yes ☐ No ☐

Existing buildings: Has the property previously had a gas supply?

Yes ☐ No ☐ Not known ☐

If the site address or contact details are the same as the correspondence details you have already provided, you can leave these sections blank.

If you answered Yes to the above question, please provide any additional details you may have (such as meter size or how much gas is being used (Hourly gas load))

Meter & Excavation details

Information below is based on an hourly gas load of up to 65kW (suitable for a U6 gas meter).

Surface Mounted meter box	Built-In meter box	Internal termination	Semi-Concealed meter box
Suitable only for hourly gas loads up to <64kW (U6 meters)	Suitable only for hourly gas loads up to <64kW (U6 meters)		Suitable only for hourly gas loads up to <64kW (U6 meters)

Northern Gas Networks will supply surface mounted or semi concealed meter boxes. If you require a built-in box, you or your builder will need to supply this and build it into your wall. Which kind of meter box/termination would you like?

Where do you want it to be installed? an example answer might be 'left hand wall'

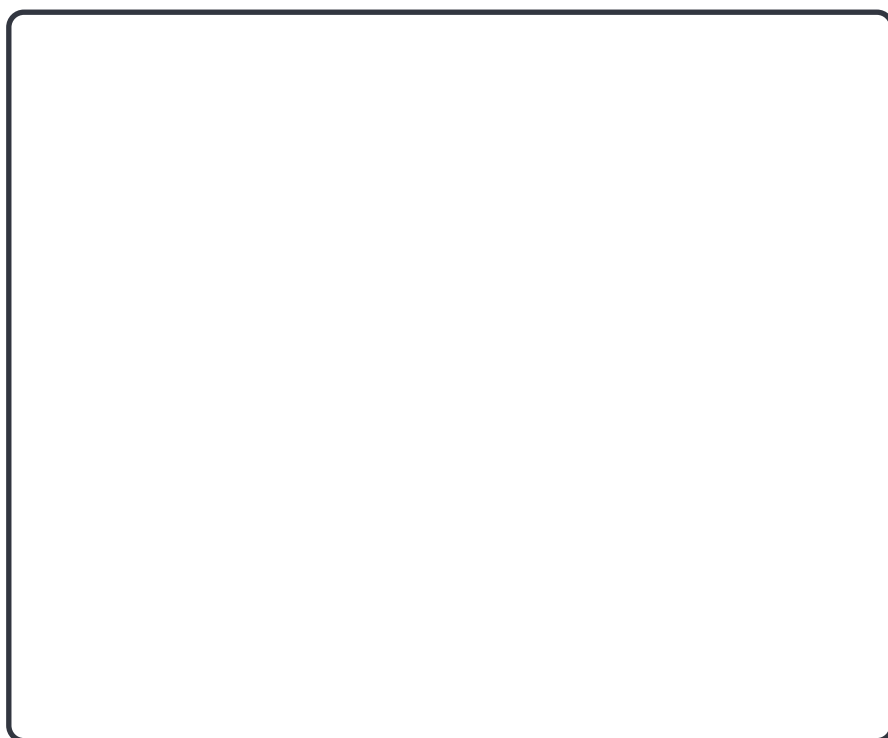

Northern Gas Networks do not fit gas meters

You will need to contact your preferred gas supplier and arrange for them to fit a meter to your new gas supply.

Please add a drawing of your property and include where you would like your meter to go, or any other information which you feel would be useful to help us process your application. Alternatively, you can provide a site plan with your application.

Please bear in mind:

- a) Your meter must be positioned on the wall of the property that faces the gas main or no further than 2m down the side of the property.
- b) Meters must be located in a position where they are not at risk of damage; for example, surface mounted or semiconcealed meter boxes cannot be installed on a driveway where there's not enough additional clearance for a car to pass safely.
- c) The meter must be positioned so that the pipework can be diverted to avoid any obstacles that may not show up on a map, for example, a pond or a tree.

Example Site Plan

Who will be doing the digging on your property?

I would like to do my own digging ☐

This means that you will dig the trench where we will lay the gas pipe. You will also be responsible for reinstating (filling in) the trench once we have laid the pipe.

Northern Gas Networks to dig ☐

This means that NGN will dig the trench for the gas pipe and then NGN will also reinstate the trench once the gas pipe is laid.

What to expect from the reinstatement process

1

Filling excavations

First, a grab vehicle will visit the site to fill in any excavations. We'll use approved recycled material wherever we can to reduce our impact on the environment.

2

Relaying surface layers

Our contractors will complete the final layers to the highest standard and will try to match the existing surface as much as possible.

3

Clearing the site

Then our support drivers will clear all our equipment from the site.

Site considerations

Please tell us anything unusual about the site, for example, specialist surfaces such as printed concrete, stone or resin driveways, steep or high boundary walls, streams, access issues, railway crossings, watercourses, conservation area or contaminated land:

Are there any further developments or additional services anticipated on site?

Yes ☐ No ☐ Dont know ☐

Did you know you might be eligible for funding on your new gas supply?

We are committed to providing all our customers access to our services. Funding may be available to assist with the cost of your gas connection. Let us know if you would like our Assisted Connection Partner, Communitas Energy CIC, to get in touch to discuss available support?

Yes ☐ No ☐

If you have already been in contact with Communitas Energy and they have issues you with an assisted connection voucher code, please enter the details below.

The first part of the code (for example C1E): _____

The second part of the code (for example 12345): _____

Declaration

By submitting your application, you agree to Northern Gas Networks processing your personal data to process your connection application. If you accept our quotation, on completion of the connection we may also share your personal information with a nominated third party who may contact you to participate in a customer satisfaction survey to complete in accordance with Ofgem's customer satisfaction survey procedure. Your personal data will be processed and stored in accordance with the Data Protection Act 1998.
